M. 23

Figure 1 is a line graph showing the relationship between the number of days since the start of the outbreak (X-axis, 0 to 50) and the number of cases (Y-axis, 0 to 200). The graph shows a sharp increase in cases, reaching a peak of approximately 180 cases around day 10, followed by a decline and then a plateau around 100 cases from day 20 onwards. A scale bar indicates 1:1,000.
